Impact of **LAND LEVELLING** at Village Thakarwadi, Tal. Purandar, Dist. Pune:

About 3 months ago, we had done land levelling of the lands of few villagers from Thakarwadi and Kotamdara villages from Ambegaon Taluka. The silt that was taken out in desilting work was spread out on these lands. In this rainy season, these villagers could grow potatoes and ground nuts. The villagers are from extremely poor strata and generations together have been working as laborers. For the first time in their life they could do farming in their own land. Their income level will increase multifold....beyond their imagination. This has become very successful experiment.
