

CDP BHARAT FORGE GmbH: DRIVING INNOVATION & GLOBAL COMPETENCE

Bharat Forge's relationship with Germany began when it acquired the German operations of Carl Dan Peddinghaus GmbH & Co. KG (now renamed as CDP Bharat Forge GmbH) in early 2004. CDP Bharat Forge is member of the Kalyani Group — one of the leading industrial houses in the world, having diverse business interests in engineering steel, forgings, auto components, non-conventional energy and speciality chemicals. The Kalyani Group is located in India, U.S.A., Scotland, Germany, Sweden and China. The CDP Bharat Forge is one of the major massive forging companies in the world. It is the leading supplier of forged chassis, engine components and non-automotive systems to well-known automakers.

CENTRE OF EXCELLENCE: RAILROAD COMPONENTS

The Center of Excellence "Railroad Components" is meant to be the contact point for its customers requiring consultation and selection of suitable components for low maintenance and lubrication-free switches and crossings. The business unit has already been specialising itself for developing and manufacturing low-maintenance and lubrication-free switch components.

Baba N Kalyani, Chairman and MD, Bharat Forge Ltd., being conferred "Cross of the Merit" by Michael Steiner, German Ambassador to India.

COMPETENCE DEVELOPMENT AND PRODUCTION

CDP Bharat Forge understands itself as "Full Service Supplier" taking responsibility of all services spanning from consulting on product development, calculating and testing components and production up to commissioning and supplying to the customer. Product development, fully supported by latest design software, is carried out in cooperation with the customer aimed at supplying a product with high benefit within a short period. Production is made by employing high performance processing machinery that leads to high precision and quality.

TOP QUALITY: PRODUCT SAFETY

At CDP Bharat Forge, all pro-

cesses are subjected to highest standards on quality and safety — spanning from product development to series production. Product realisation is supported by latest test and measuring methods. The essential safety components have been steel forged so as to withstand highest demands both on material and use.

Not without good reason CDP Bharat Forge is Q1 supplier of Deutsche Bahn AG. Our quality management system has been comprehensively certified (according to ISO TS 16949). In addition, CDP Bharat Forge has received the Environment Certificate — according to DIN ISO 14001 as first forge in Germany — expression of our active dedication to environment.
